

# SUDDEN DEATH IN FINISHERS

**Farm  
Health  
Planning**

**Healthy Animals  
Healthy Profits**

Building:

See reverse for an example.

Each time a sudden death occurs in the finishers, colour in a square on the chart corresponding to week in which it died.

Mark on any key management decisions, e.g change of feed, medication given etc.

Note environmental problems including issues with ventilation and particularly hot weather

Discuss limits and review regularly with your vet

Set limits for sudden deaths in each batch and create protocols to follow if they rise over these limits.
